## **PART 1: MULTIPLE CHOICE**

Mark ONE letter A, B, C or D on your Answer Sheet for questions from 1 to 28.

Read the following passage and mark the letter A, B, C or D on your answer sheet to indicate the correct answer to each of the questions from 1 to 5.

Yosemite National Park, which is one of the America's 20 most popular national parks, is California's first national park to be protected since 1864. Yosemite National Park is best known for its waterfalls; but within its nearly 1,200 square miles, the visitors can find deep valleys, grand meadows, ancient giant sequoias (redwood trees) and a vast wilderness area.

Yosemite is one of the largest and least fragmented habitat blocks in the Sierra Nevada, and the park supports a diversity of plants and animals. Of California's 7,000 plant species, about 50% occur in the Sierra Nevada and more than 20% are within Yosemite. The park contains five major vegetation zones and suitable habitat for more than 160 rare plants, with rare local geologic formations and unique soils which characterize the restricted ranges many of these plants.

The name "Yosemite" (meaning "killer" in Miwok) originally referred to the name of a disloyal tribe which was driven out of the area (and possibly wiped out) by the Mariposa Battalion. Previously, the area had been called "Ahwahnee" ("big mouth") by **indigenous** people.

On average, about 4 million people visit Yosemite each year and most of them spend the majority of their time in the 5.9 square miles of Yosemite Valley. The park set a visitation record in 2016, surpassing 5 million visitors for the first time in its history. Although Yosemite was central to the development of the national park idea, the citizens tried to protect Yosemite Valley from development, leading to President Abraham Lincoln's signing the Yosemite Grant in 1864. Thus, they have the Congress establish a larger national park by 1890 to encompass the Yosemite Valley and its surrounding mountains and forests.

nat	ional	park by 1890 to encom	pass the Yosemite Valley a	and	its surrounding mounta	ains	and forest
<u>1:</u>	What percentage of California plant species does Yosemite make up?						
	A.	three quarter	<b>B.</b> more than a half	C.	over one-fifth	D.	a quarter
<u>2:</u>	Wher	e did the name of Yose	emite come from?				
	<b>A.</b> The name of an ethnic group		group	<b>B.</b> The famous grand meadows			
	C.	The Yosemite Grant		D.	The variety of plants a	and a	animals
<u>3:</u>	What	is the word "indigeno	us" closest in meaning to?				
	A.	modern	B. foreign	C.	native	D.	migrant
<u>4:</u>	Acco	rding to the passages, a	all of the followings are true	е ЕХ	KCEPT		_•
	A.	there used to be five r	nillion visitors that came to	the	park		
	В.	Yosemite National Pa	rk is famous for its waterfa	lls			
	C. there are more than six vegetation zones in Yosemite National Park						
	D.	Yosemite National Pa	rk is located in California,	Am	erica		
<u>5:</u>	What	does the author mainly	y discuss in the last passage	?			
	A. The number of visitors to Yosemite National Park every year						
	В.	How the citizen conse	erves the Yosemite Valley				

C. The biodiversity in Yosemite National Park

**D.** The origin of the name of Yosemite National Park

kead the following passage and choose the correct word or phrase that best fits each of the numbered						
blanks from 6 to 10.  In recent years, the earth's previous rainforests have been (6) stake. They become smaller and						
am al		<del>-</del>		=		
	smaller, and the situation becomes worse and worse every day. Rainforests are the (7) of many rare					
	and beautiful plants, animals, birds and inserts. For example, the Amazon rainforest in Brazil has a richer flora					
	than anywhere else on earth. Some plants are important for medical (8) to do research. One day, they may help us to cure diseases such as cancer, AIDS, heart disease or many other sicknesses. However,
