#### The People behind the Music

Think for a moment about the last music album you bought. Most likely, you'll think of the singer or band that made you want to buy the album. You might even know the name of the guitar player or the drummer. Those talented performers, however, are only some of the people in the music industry work behind the scenes, but the roles they play in the musical progress are very important.

**Songwriters:** Songs begin with the songwriter. Some songwriters work alone, but many work in teams that combine the talents of a lyricist, who writes the words to songs, and an instrumentalist, often a piano player or guitarist, who writes the music. Many of today's pop stars work with songwriters. For example, some of Lady Gag's biggest hits were written by Nadir Khayat, also known "RedOne". Some songwriting teams have become very famous, such as Mike Stock, Matt Aitken, and Pete Waterman, who were responsible for many big 1980s pop hits.

**Arrangers:** After a song has been written, music arrangers make it more appealing by deciding which instruments will be used, what tempo, or speed, the song will have, and whether the song should have a lower or higher pitch. A good arrangement can bring a song to life and make it a **classic**.

**Studio Musicians:** Not every singer or instrumentalist can be a star, and many work in the background as studio musicians. These artists are not a part of any one musical group. Instead, they are hired for recording sessions that eventually become the albums you buy, as well as soundtracks

for television shows, movies, and radio ads.

**Recording Engineers:** Recording engineers also play a major role in creating the final sound that you hear. First, these engineers set up the recording studio, the room where the performers play, placing musicians and microphones in exactly the right places to get the best sound. Next, they use electronic equipment, such multi- track recorders, to capture the music. Finally, long after the musicians have gone home, recording engineers use a mixing board to balance the melodies and rhythms of each musician, and sometimes to incorporate special sound effects or additional tracks.

Many people make a living with music. You may not recognize all of their names, but all of them work together to create the songs you love to listen to.

Question 28. Which piece of equipment is used at the end of the recording process?

A. a multi-track recorder

**B.** a guitar or piano

- **A.** They work in the recording studio.
- **B.** They earn money for each session that they do.
- C. They are not as famous as the artists they play for.
- **D.** They usually support or play for the same artist.

Question 30. The word "classic" in paragraph 3 is closest in meaning to

**A.** a traditional song

**B.** a famous song

C. a lively song

**D.** a modern song

Question 31. Why does the author mention Lady Gaga?

- **A.** to give an example of a star who works with a songwriter.
- **B.** to explain why she does not write her own songs.
- C. to compare her with other talented songwriters.
- **D.** to persuade readers to buy her music.

*Question 32.* The article is mainly about

- A. people who play a background role in creating music
- **B.** pop stars who write the biggest hits
- C. songwriting teams who combine their talents
- **D.** instrumentalists who work as hired musicians

#### The Rise of Robots

As kids, our grandparents frequently scared us by talking about how difficult life was when they were growing up. They mentioned walking miles to school in the snow, or doing hours of manual labour for little pay. Life has changed greatly since then, and it seems to get easier year by year. In fact, with the help of robots we soon might have to do much at all. But is this a good thing?

By 2030, it's estimated that robotics will be a \$10 billion business worldwide. Companies are already starting to integrate them into the workforce. The electronics manufacturer Foxconn is drawing up plans to launch a factory within the next 10 years that's completely staffed by robot workers. Meanwhile, an American company Briggo has invented a robot that serves gourmet-quality coffee to customers. With the push of a button it will crush coffee beans, measure exact quantities of water, and even wave a steam wand to ensure customers get the perfect cream on top. Unlike human baristas, it can serve multiple drinks at once and work all day and night without a break.

Robots are also invading our homes. The Rooma is a mini-robot that vacuums rooms automatically according to a schedule. The Robomow is a device that will cut the grass for you while you sit in the shade. Then there's the Nanda clocky, an alarm clock that makes sure that even the deepest sleepers get up on time. The clock is attached to a pair of wheels, and it will randomly move around the room. Once you finally catch it, you're probably too awake to hit the snooze button. Although these early home robots are somewhat basic, they will likely become more capable as times goes on.

Although robots certainly help us to eliminate *tedious* tasks, many people are concerned about a future filled with robots. Some fear that humanity will start to decline if machines do everything for us. Others have even warned about the robot rebellion, in which robots become so smart that they may decide to turn on their masters. These ideas may seem a bit far-fetched, but there

robotic future. **Question 33.** How is Briggo's invention superior to human workers? **A.** It is more knowledgeable about coffee-making. **B.** It is better at conversation. **C.** It never has to stop. **D.** It can operate machinery. Question 34. What would happen if you pressed the snooze button? **A.** You would have to wake up immediately. **B.** The alarm clock would turn off forever. C. The alarm would stop, but go off again soon. **D.** Nothing would happen at all. **Question 35.** Which of the following is NOT true about the concerns over roboties? **A.** It takes some time for people to accept robots. **B.** Robots may do some harm to humans C. The idea of robotics may seem far-fetched. **D.** Robots may be dominant at the workplace. Question 36. The word "tedious" in the last paragraph mostly means A. boring **B.** difficult C. intelligent **D.** expensive **Question 37.** What is the last paragraph mainly about? A. Some reasons why people don't accept robots yet. **B.** A very amusing science-fiction story about robots. C. How people in local communities are supporting robots. **D.** A few of the lastest robots on the market today. Question 38. According to the first paragraph, how is the life changed since our parents time? **A.** The education system has got much worse. **B.** Things aren't as hard as they once were. C. It hasn't changed much at all. **D.** Children have to walk longer distance to school. *Question 39.* All of the following are true about robots EXCEPT that . A. they can work all day and night without break **B.** they have greater capabilities C. they can draw up plans to launch a story **D.** they can do boring tasks for human **Question 40.** We can infer from the passage that A. present domestic robots can work without any programs **B.** the communication will decline with the use of robots C. a robot rebellion can happen daily **D.** robotics will have been a major business by 2030 Read the following passage and mark the letter A, B, C, or D on your answer sheet to indicate the correct word or phrases that best fits each of the numbered blanks.
