Lan will start with the main cause of global warming. Then, Nam continues with some effects of global warming. And Trang will finishes with some solutions to the problem.

So now Trang, could you tell us about the main reason for global warming

Trang: Well, I think that the emission of carbon dioxide into the atmosphere is the main cause of this problem. As you know, carbon dioxide can retain the heat from the sun, so the more carbon dioxide there is in the atmosphere, the hotter our earth.
