

## ALL ABOUT H2T ENGLISH DEPARTMENT

In H2T English Department, we believe in enriching our students' lives and shaping their understanding of the challenging, diverse and ever-changing world. Besides equipped with sufficient knowledge for their best performance in the national exam, students are also given the opportunity for their creativity, self-expression and personal development through in-class presentations, role-plays, mini projects such as making videos or extra-curricular activities. Through the study of English, we aim to create global citizens who are able to communicate with one another effectively and learn to respect other cultures. Through engagement with texts of various topics, we aim to instill a love of information seeking, which will enable students to become lifelong readers and critical thinkers. Each teacher in our department has different teaching styles and strategies, which will give students great experience during three years at school.

## ACTIVITIES

### Extra-curricular activities

“Play Together, Progress Together and Enjoy Together”. These activities attract all students in the school to join excitedly. This is a chance for them to challenge their knowledge and have fun together.

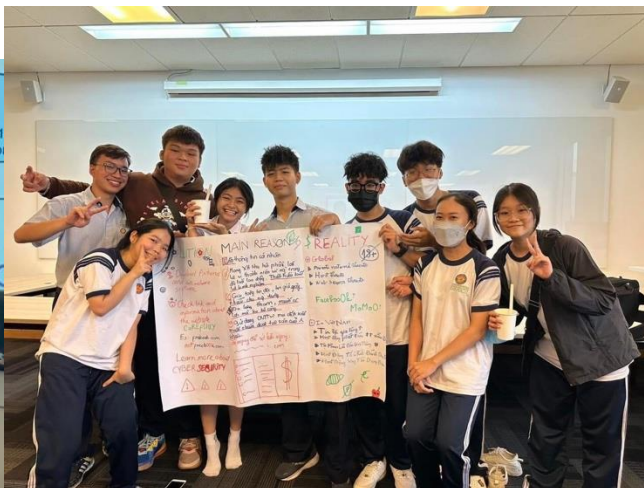

## University campus visits

A university campus visit is a great chance for high school students to not only see the campus, but also to ask questions about the school and what the experience is like on campus.

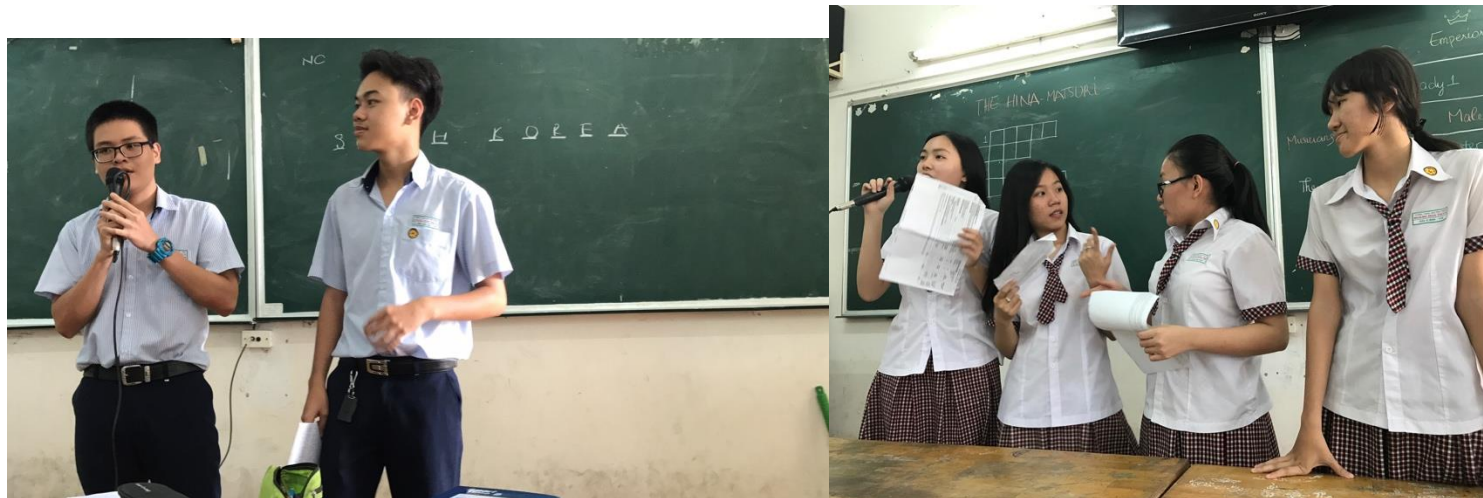

## In-class presentations

An in-class presentation is a potential barrier to success at school. It gives students a chance to improve their public speaking skill. Our teachers provide students with appropriate techniques when they are preparing for and delivering a presentation, help them ease their nerves and make them believe in themselves that **THEY CAN DO IT**.

### **Making videos**

Making videos in English learning class is a fun way to get involved while using English. It is even more fun when students working in groups and have a video to show off to friends and family.

### **Examinations**

Exam-based tasks help students get familiar with the tests during their learning process. Mid-term and final tests focus on reviewing knowledge essential for the national high school examination and university entrance examinations.

### **Achievements**

Students not only have got good results in the national high school examination and university entrance examinations but also in examinations for the gifted.
