<b>Question 11.</b>	<b>A.</b> who have studied m	usic	<b>B.</b> that studied musi	c	
	<b>C.</b> who were studying i		<b>D.</b> studied music		
Question 12.	<b>A.</b> these school subjects	s are connected in some	e way		
	<b>B.</b> students are connect	•			
	C. it makes it easier to	connect in some way			
	<b>D.</b> these school subjects	_	ay		
Question 13.	<b>A.</b> but believe more in		<b>B.</b> believing more in	n yourself	
	<b>C.</b> so believe more in y	ourself	<b>D.</b> and believe more	e in yourself	
<b>Question 14.</b>	A. when you started co	mposing your own pied	ces of music		
<b>B.</b> when you are able to start composing your own pieces of music					
C. to start composing your own pieces of music					
	<b>D.</b> when having able to	start composing your	own pieces of music		
Question 15.	<b>A.</b> your stress	<b>B.</b> their stress	C. her stress	<b>D.</b> this stress	
Read the follow	ving passage and choose	e the letter A, B, C, or I	on your answer she	et to indicate the correct answer	
to each of the	questions from 16 to 20.				
Scientists 1	have dreamed for a long	g time about building a	flying train' which	can float through the air above	
the tracks. Wi	th Maglev technology,	their dreams are now	a reality. Maglev ti	rains have no wheels. Instead,	
<i>powerful</i> mag	nets lift them into the a	ir and push them forw	ard, at speeds of up	to 500 km per hour.	
As well as	speed, Maglev has a n	umber of advantages	over other transport	systems. The trains are quieter	
and the journe	y is smoother because t	they don't have wheels	s. They are also green	ner because they don't use fuel	
and so create l	ess pollution. Right nov	w there is only one hig	h-speed Maglev trair	n system in the world. It carries	
passengers fro	m Shanghai city centre	to the airport. Howev	er, work has started	on a new, longer Maglev track	
in Japan. Train	ns will go from Tokyo t	to Nagoya in 40 minu	tes. But don't expect	t to ride on it on your next trip	
to Japan. It wo	on't open until 2027! Ti	hen, in 2045, the line	will extend to Osaka	•	
There is o	one major problem wi	th Maglev technolog	y: it is incredibly e	expensive to build the tracks.	
Transport plan	nners predict that the To	okyo to Osaka line wi	ll cost 91 billion dol	lars. The high cost means that	
Maglev techn	ology probably won't	replace other forms	s of transport in th	e near future. However, the	
technology is	still in development ar	nd somebody might fi	nd a cheaper and sin	mpler way to build the tracks.	
And then, who	knows? In the future,	some of us might fly	to work by train.		
-	,	• •	•	oline Krantz and Julie Norton)	
Question 16.	Which of the following	` <u>-</u>	•	,	
A. Flying by Train  B. The End of Trains?					
	ystem in Shanghai	D.	The Next Generatio	n of Technology	

Question 17. The work	d <b>"powerful"</b> in paragraph 1 is	s closest in meaning to _	
<b>A.</b> heavy	<b>B.</b> simple	C. strong	D. standard
Question 18. Accordin	ng to paragraph 2, Maglev train	ıs	
A. require a special	type of fuel	B. don't do much har	rm to the environment
C. travel faster than	other vehicles	<b>D.</b> don't make any no	oise
Question 19. The work	d "they" in paragraph 2 refers	to .	
<b>A.</b> wheels	<b>B.</b> transport systems	C. advantages	<b>D.</b> Maglev trains
