TASK 1

Script:

Sophia: What are you watching, Dad? You look so serious.

Dad: A documentary about the negative effects of using non-renewable sources. You should watch it to learn about them.

Sophia: Yes, I will. But I know non-renewable sources, such as oil and natural gas, still play an important role in our daily life. They help drive heavy machinery, heat homes and cook food.

Dad: That's true, but we can use alternative energy sources to do them like solar energy, nuclear energy and wind energy.

Sophia: I don't think so, Dad. Though all of them are unlimited and clean to use, they are so expensive to produce. In addition, nuclear energy might be dangerous for people's lives if there are any radiation leaks.

Dad: Maybe you're right, my dear. But have a look at this on TV. Many pollutions caused by using non-renewable sources are affecting our health and environment badly.

Sophia: It's sad. I just hope that modern technologies can help people to solve this complicated problem.

TASK 2

Script:

Super Wind is a new model of future electric cars. This one has six seats, and it is designed elegantly and beautifully. It's also very fast and safe. It can run more than 350 kilometres per hour, and its battery just needs charging every 750 kilometres. The car engineers equipped it with a modern control system that drivers can choose either manual driving mode or driverless mode. If drivers feel tired or get drunk, they can choose the autopilot function and then rest until it carries them to home. Although it has many functions, it is economical and not expensive. Those middle-income customers can own it easily. Car lovers strongly believe that Super Wind will be popular in the near future.

TASK 1

Script:

Thu: How was your travel to Alaska, Ron?

Ron: It was fantastic. Although it was very cold, I did many interesting activities like ice fishing or sleeping in a big igloo.

Thu: Wow! How did you move there?

Ron: I rode a dogsled pulled by powerful dogs on the snow and through the forests. It was like getting lost in a marvelous snow kingdom.

Thu: Sounds cool. I'm a dog lover, so I really want to try travelling with those native dogs. Did you see any bears?

Ron: No, I didn't. Because I went there in October when all bears often sleep.

Thu: What a pity!

Ron: Yes, I know. But I had a great chance to see the northern lights. They were too beautiful to describe in words.

Thu: Awesome! I'm sure Alaska will be on the list of my future destinations.

TASK 2

Script:

Hello, everybody. Our group will have an important presentation next week, so we need help from all of you to complete this form of our survey on the benefits of some energy sources. First, there are four types that you can tick as your favourite: solar, wind, hydro and nuclear energy. Second, we offer you some benefits to choose, including good for environment, safe and easy to use, cheap and available. If you have another idea, you can write in the blank below. The final one is the application of these sources in the fields of life, such as travelling, cooking and heating, and making products. Similarly, you can write in the blank below to express your own idea. Thanks for your help.
